Art Unit: 3744

The drawings are objected to under 37 CFR 1.83(a) because they fail to clearly show the connection between the ends of the condenser tanks and the integral hooks/snap hooks formed on the radiator tank as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be clearly shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The Examiner particularly notes that in regard to claims 5 and 6, although the prior art does not specifically show a mounting bracket that employs a combination of a rigid hook and a snap action hook as these terms are commonly understood, the lack of clear illustration of these features makes it impossible to ascertain what sort of attachment applicant envisions in describing and claiming these features.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Clifton.

Clifton shows a condenser/radiator combination with mounting brackets to hold the headers of the condenser are integrally molded in the radiator tanks. See Figs. 1-3. Regarding the "clip shaped fin" of claim 8 note lower brackets 13, 57 of Clifton.

Claims 4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Heine et al.

Note snap hooks 17, 18 of Heine et al. which engage integrally formed "detent edge" 23 in the side of header 6. Regarding claim 7, note the rigid securing web 35 in the Fig. 11 embodiment.

Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The remaining references of record show various integrally formed attachment means for plural heat exchangers.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen J. Flanigan whose telephone number is (571) 272-4910. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on (571) 272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
